

KNIPEX DP50 – Pipe Cutter

# In a single operation: Cut – chamfer – done!

Quickly cut and chamfer plastic pipes up to Ø 50 mm

Scan the code for the  
instruction manual

Squeeze the blue lever to posi-  
tion the blade against the pipe.

# KNIPEX DP50

## Pipe Cutter for plastic drain pipes

**One tool, two functions, three diameters: cut common domestic plastic wastewater pipes quickly and easily**

- ▶ Cut and chamfer all common domestic plastic drain pipes up to Ø 50 mm in a single operation
- ▶ Reversible high-quality ball-bearing steel blade, can be easily replaced without tools
- ▶ Clean cut: no readjusting or deburring required, reducing potential blockages or damages of the seals
- > Cuts high temperature and other plastic pipes with Ø 32, 40 or 50 mm and wall thicknesses up to 2.4 mm
- > Optimal cutting due to slide-bearing and self-adjusting guide rolls
- > Easy positioning due to clear view of cutting point
- > Spring-loaded blade: no inconvenient readjusting while cutting
- > Exchangeable blade with two cutting edges can be reversed when showing signs of wear
- > Cuts lengths as small as 10 mm
- > Durable housing made of glass fibre reinforced plastic

Three diameters with one tool: the pipe diameter can be preset with the metal adjuster.

Segments as short as 10 mm can be cut. The spiral chip comes from chamfering.

When worn, the blade can be reversed or replaced without the need for tools.

Once in place, the spring-loaded blade exerts enough pressure for the cut – no readjustment necessary!

In a single operation the blade cuts the pipe and forms the chamfer for a proper connection.
