

AVAILABLE FROM SUMMER 2023

The new one-handed clamp with 360° rotating handle

Simply better.

Whether it's assembly or carpentry work, drywall, kitchen or shop fitting: when it comes to one-handed clamping and spreading work, professionals and do-it-yourselfers alike can benefit from the **EZ360** all round.

BESSEY has succeeded in making the entire handle unit rotate around the rail. A 12-step latching mechanism ensures that the selected handle position is held securely.

Depending on the work situation, the most ergonomic pump position can be selected to fix the workpiece comfortably and securely – whether far up, down or from the opposite side.
